Eben Haezer Maharadja

IT / Software Development Intern | Salatiga, Central Java, Indonesia
+62 812-5311-3623 | ebenhaezermaharadja@gmail.com | linkedin.com/in/ebenmaharadja | ebenweb.my.id | github.com/Ebenn3107
Available for a 3–6 month internship starting January 2027 · open to on-site placement, including outside Java

Summary

7th-semester Informatics student (GPA 3.60) who builds and deploys Laravel web apps, including an e-commerce site with Midtrans payments and a clinic booking system, both live on my own domain. Uses AI coding agents (Claude Code, Codex) to ship faster. Looking for a web or software engineering internship from January 2027.

Education

Universitas Kristen Satya Wacana (UKSW) Salatiga, Indonesia
Bachelor of Informatics Engineering, GPA 3.60 / 4.00 (7th semester) *2023 – Present*

- Relevant courses: Algorithms & Data Structures, Software Engineering, Object-Oriented Programming, Machine Learning

Projects

Dental Clinic Booking Web App | *Laravel 11, Filament 3, Livewire 3, Tailwind CSS, MySQL* dental.ebenweb.my.id · 2026

- Built an online booking flow (service → dentist → date → available slot) with a unique booking code and one-click WhatsApp confirmation.
- Computed available slots in real time (15-minute intervals by service duration), excluding active bookings, dentist leave, and past times.
- Prevented double booking with a database transaction and row locking (`lockForUpdate`), covered by an automated test.
- Built a Filament admin panel for services, dentists, schedules, leave, and booking status; deployed on shared hosting with a custom subdomain.

Rupa Kain – Fashion E-commerce Web App | *Laravel, Blade, MySQL, Midtrans* rupakain.ebenweb.my.id · 2026 (demo)

- Built a fashion e-commerce site with product catalog, category filters, price sorting, and color/size variants.
- Implemented cart, authentication, and checkout with region-based shipping rates.
- Integrated Midtrans payment gateway; tested the full flow end-to-end in sandbox (QRIS).
- Built guest order tracking using order code and phone number, plus custom 404 and size-guide pages.

GoMount – Mobile App Design for Hikers | *SRS, UI/UX Design, V-Model* Academic team project

- Co-wrote the Software Requirements Specification (functional and non-functional requirements) and contributed to the UI/UX design.
- The team validated the design with 30 respondents, reaching 80.22% user acceptance.

Hezer Code – Personal Freelance Brand (in setup) | *Web development services for small businesses* Salatiga · Oct 2026

- Set up a freelance web development brand targeting Indonesian SMEs (websites and simple information systems).
- Run the full stack myself: domain, hosting, deployment, and AI-assisted development workflow.

Skills

Languages: PHP, Python, SQL, HTML, CSS
Frameworks & Libraries: Laravel, Blade, Livewire, Filament, Tailwind CSS, Midtrans API, Pandas
Tools: Git, MySQL, shared hosting & domain setup, Claude Code, Codex
Concepts: OOP, data structures & algorithms, UML, SRS, V-Model
Languages Spoken: Indonesian (native), English (reading: intermediate, speaking: basic)
